

**ELECTRONIC IDENTIFIER
PAYMENT SYSTEM AND METHODS**
ABSTRACT OF THE DISCLOSURE

5 A payment service method and system involve a payment service provider, a
customer/payor and a consumer provider/payee. The customer/payor enrolls in the service
and is provided a unique identifier that enables the customer to conduct transactions with the
payment service provider. The customer/payor interfaces with the payment service provider
10 through various forms of communication, and can facilitate payments to the consumer
providers/payees through the payment service provider while remaining anonymous.
